EDUCATION

City University of Hong Kong Sep 2025 - Jun 2026

Master of Chemistry – cGPA:3.51/4.30 (Distinction) Hong Kong

Serve as elected Student Representative for the Department of Chemistry

Under the supervision of Professor Li Xing, conducted research on the project "Developing Redox-Active Molecules for Electrochemical Carbon Capture"

Wu Yi University Oct 2020 - Jun 2024

Bachelor of Chemical Engineering and Process Jiang Men

Outstanding Graduate of Wuyi University

Published two papers indexed by SCI: "Metal-organic frameworks-TiO₂ as a recyclable photocatalyst for the synthesis of acetals/ketals" and "Large and Tunable Wavelength Blue Shifts in Luminescent Piezochromism of Cu(I) Complexes via a Guest Encapsulation Strategy"

WORK EXPERIENCE

STO Tech HK – Research Assistant – Full Time Jun 2026 - Present

Operate FCVA DF600 system for DLC coating on precision components; monitor deposition parameters, film quality, and production consistency Hong Kong

Investigating small-radius tip peel-off in DLC films through literature review and experimental parameter optimization to improve adhesion on complex geometries (ongoing)

Led AI-enabled lean-improvement projects for engineering drawing workflows; independently designed, built, and deployed internal automation tools (see Project Experience)

Midea Group – Certification Engineer – Full Time Jul 2024 - Jul 2025

Managed and coordinated the product certification process of Midea's microwave ovens for Shun De the North American market, ensuring compliance with FDA, UL, CSA and FCC standards

Collaborated with R&D, manufacturing, and certification bodies (SGS, Intertek, UL) to communicate standards, guide design improvements, and sustain NA market access

PROJECT EXPERIENCE

BubbleMate – AI-Assisted FAI Drawing Automation (Lean Improvement, STO Tech HK) Jun 2026 - Present

Built production desktop app via AI-native development (Cursor Agent, LLM workflow orchestration, MCP tool integration) for engineering drawing balloon annotation and FA report export

Reduced per-drawing FAI workflow from ~30 min (manual, high verification error) to ~3 min for a 6-person QC team; auto-detection validated at 62/64 eval baseline with TOPWORX/ASCO FA templates

Drawing Redaction Tool – Client Information Masking (Lean Improvement, STO Tech HK) Jun 2026 - Present

Developed Python desktop utility with AI-assisted iteration for cell-level redaction of logos, CONFIDENTIAL marks, and client identifiers on engineering PDFs; ~90% automation on production drawing sets (OpenCV, OCR, Fisher/Emerson/TopWorx/MKS rules)

Laboratory Research at Wuyi University May 2021 - Mar 2024

Conducted chemical experiments and precision testing with HPLC, GC-MS, and UV-Vis; published 2 SCI-indexed papers on experimental design and data interpretation Jiang Men

Midea North American Microwave Oven Production Transfer to Vietnam Mar 2025 - Jul 2025

Organized 8 cross-border Sino-Vietnamese meetings; managed Vietnam certification documents and certified 20 high-demand models on schedule for NA shipment China and Vietnam

LEADERSHIP EXPERIENCE/ OTHER ACHIEVEMENTS

Student Representatives for the MSCHEM programme Sep 2025 - Jun 2026

Organized and assist in organizing or promoting various activities for postgraduate students in the Department of Chemistry

Represented CSCI as student representative during the 2024/25 DAA Review Visit

ADDITIONAL INFORMATION

Languages: Native Mandarin, Cantonese; Competent English (IELTS 6.5 & TOEIC 815); Basic French

Qualifications: Driver License

IT Skills: AI Agent Development, LLM Workflow Design, MCP/Tool Integration, Prompt Engineering, AI-Native Development (Cursor); Python, PyQt, OpenCV, PyMuPDF, OCR/PDF Automation; DLC/PVD Coating (FCVA DF600); Microsoft Office (Word, Excel, PowerPoint, Outlook)
